UI/UX Designer at CADIT with a background in research, wireframing and prototyping for web and mobile interfaces. Builds a component library from an existing design system and creates UI mockups for developer implementation.

Experience

UI/UX Designer | CADIT Oct 2025 - Present

Build a new component library based on the existing design system.

Create UI mockups for developers working with international clients, including Daikin Singapore, Thai Honda and SP Group Singapore.

Freelance UI/UX Designer Started Jan 2024

Designed mobile and web interfaces, websites, branding and UX assets for SME clients.

UI/UX Design Intern | Digistar Class Telkom Aug 2024 - Oct 2024

Supported user research and interface design for the PaDi UMKM seller dashboard. Completed a UI/UX design track focused on research, wireframing and Figma prototyping.

UI/UX Designer Intern | Startup Campus Feb 2023 - Jun 2023

Led the UX team on the Permy skin and hair health app prototype. Conducted user research and evaluative testing and translated findings into the interface.

Selected work

Aurelia | Hospitality concept
Independently designed and built a concept for comparing Bali stays by trip intention and checking practical details before making a request. View the live concept.
